

HELPING TO PREPARE YOUR CLIENT'S HOMES FOR A COMPLETE INSPECTION

- 1. Please contain any animals who may be uncomfortable with strangers in their home.**
- 2. The inspectors will need access to the entire exterior of the structure (decks, patios and outbuildings) that are to be inspected.**
- 3. Make sure to have the perimeter of the garage cleared (approx. 2') so that the Inspectors can inspect the entire garage. Any storage in a built in cabinet does not need to be removed.**
- 4. For the Home Inspection: Please have the window coverings opened so that the Inspectors have access to the windows (especially window blinds).**
- 5. The inspectors will need access to every room in the home (closets, bedrooms, bathrooms and storage areas).**
- 6. Please have the subarea and attic access areas unlocked and accessible.**

To minimize further inspection, utilizing these helpful tips will aid you toward a complete inspection report.
